

 **Sealed Air**

Stratocell[®] E, S, H Plus

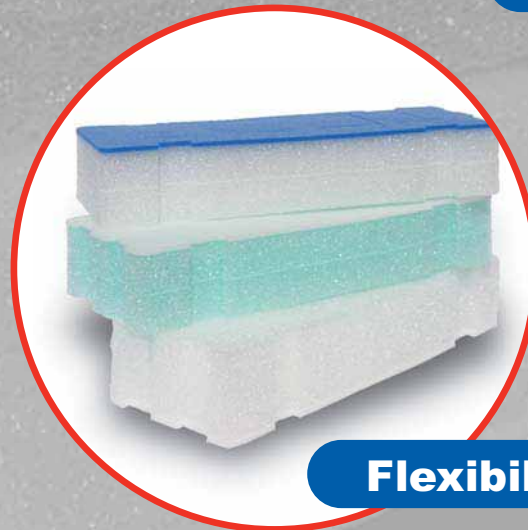

Special Density Foam and Film Laminates

**Ideal For A Wide Range Of High-Efficiency Cushioning Applications
Where Extra Strength And Durability Are Required**

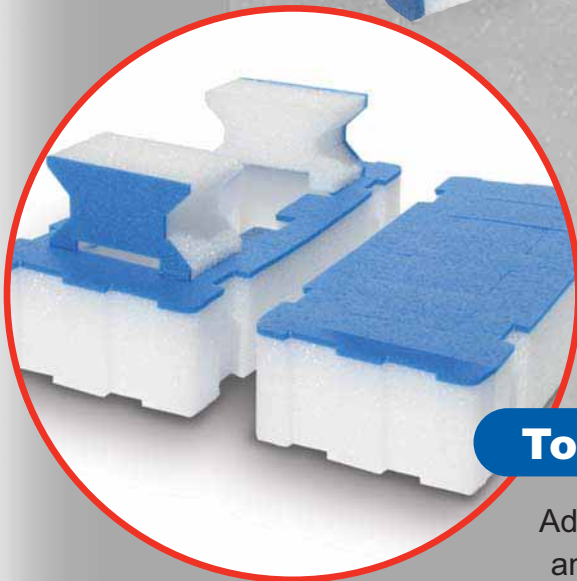

Performance!

Thicker layers offer superior protection.

Flexibility!

Available in a variety of colors, thicknesses, densities and configurations.

Toughness!

Added durability and resilience.

Stratocell[®] E, S, H Plus is the **high-performance, low-cost** foam laminate!

Stratocell® E, S, H Plus Foam Laminates

Lightweight Foam Laminates Provide Outstanding Protection and Efficiency

Stratocell® E, S, H Plus foam laminates are a unique combination of our standard Stratocell® laminated polyethylene foams, with the addition of either a 3.5 mil polyethylene film, or 1/8" high-density Cellu-Cushion® polyethylene foam laminated to one side.

Superior Performance and Product Protection

Stratocell® E, S, H Plus foam laminates provide the proven benefits of Stratocell® laminated polyethylene foams plus extra strength and durability.

Application Versatility

Stratocell® E, S, H Plus foam laminates add strength and durability for a variety of packaging and non-packaging applications.

Easily Fabricated

Stratocell® E, S, H Plus foam laminates can be easily converted using traditional fabrication techniques. "Pop-up" cushion designs are easily manufactured by "kiss cutting" the foam during the die cutting operation – what remains is a strong 3.5 mil film, or 1/8" high density foam skin.

Cost Savings

A wider range of products can now be packaged utilizing the "Pop-up" cushion concept because of these extra strong foam laminates. The "Pop-up" design allows cushions to be shipped flat, greatly reducing shipping costs and storage space. And, because the cushions are produced in one step, labor costs are also reduced – gluing and heat welding of fabricated parts are eliminated.

Availability

Stratocell® E, S, H Plus special density foam and film laminates are available in large 48" x 108" sheets, in a wide range of thicknesses and densities, with either a 3.5 mil polyethylene film or high-density 1/8" Cellu-Cushion® polyethylene foam backing.

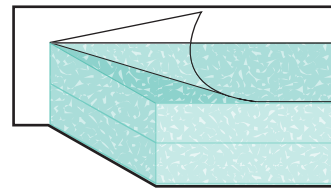

Environmental Advantages

By providing better product protection with less material, Stratocell® E, S, H Plus special density foam and film laminates contribute to source reduction. They are made with a CFC and HCFC-free process, and pack components can be reused numerous times.

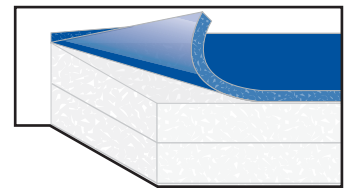

Efficient "Pop-up" cushions ship flat, then set up without gluing or heat-welding.

Available in a variety of colors, thicknesses, densities and configurations.

Durable 3.5 mil P.E. film backing

High-density 1/8" P.E. foam backing

Standard Sizes

Stratocell® E Plus	Mint Green Stratocell® E laminated to 3.5 mil transparent P.E. film
Stratocell® S Plus	Natural Stratocell® S laminated to 1/8" Cellu-Cushion® P.E. foam
Stratocell® H Plus	Natural Stratocell® H laminated to 1/8" Cellu-Cushion® P.E. foam
Notes: Additional thicknesses and densities are available upon request. Contact your Sealed Air consultative sales representative for details. Pop-up cushion design is licensed under U.S. Pat. Nos. 5,876,813 and 6,167,790.
